

INNOVATIVE AND RELIABLE
SOLUTIONS FOR THE DEFENSE INDUSTRY

BEVENIC

MADE IN FINLAND

BEVENIC SOFT MOUNT

Advanced Recoil Management for Mounted Weapon Systems

BEVENIC SOFT MOUNT is an advanced recoil management solution designed to enhance accuracy, stability, and operational performance in mounted weapon systems.

Installed between the weapon and its pedestal, vehicle mount, or tripod, the Soft Mount absorbs recoil energy and enables controlled rearward movement during firing. Advanced spring, pneumatic, or hydraulic technologies provide smooth recoil absorption and a precise, repeatable return to the defined starting position.

Designed to accommodate M2 HB and 40 mm GMG configurations, the Soft Mount offers a robust and adaptable solution for demanding defence applications.

By reducing recoil impact and maintaining consistent weapon alignment, the Bevenic Soft Mount supports improved accuracy, system stability, and reliable performance throughout repeated firing cycles.

Bevenic Soft Mount – engineered for controlled recoil, precise positioning, and reliable performance.

QUALITY IS
AT THE CORE
OF OUR
BUSINESS

We provide industrial services built around the highest standards of quality, durability, and safety. We believe quality is created in the process – through robust manufacturing practices, skilled people, and continuous improvement.

Our quality management is supported by systematic monitoring, testing, and inspection to ensure consistent performance and compliance with industry-specific requirements. Our products are manufactured in Finland in AQAP-compliant production facilities, where quality is built into every stage of the manufacturing process.

MAXIMIZE THE PERFORMANCE IN THE FIELD

1 REDUCES RECOIL AND STRAIN
Minimizes recoil, reducing strain to the operator and mounting point while enhancing control and overall performance.

2 IMPROVES ACCURACY ACROSS FIRING MODES
Delivers superior accuracy in both single-shot and rapid-fire modes for consistent precision in any situation.

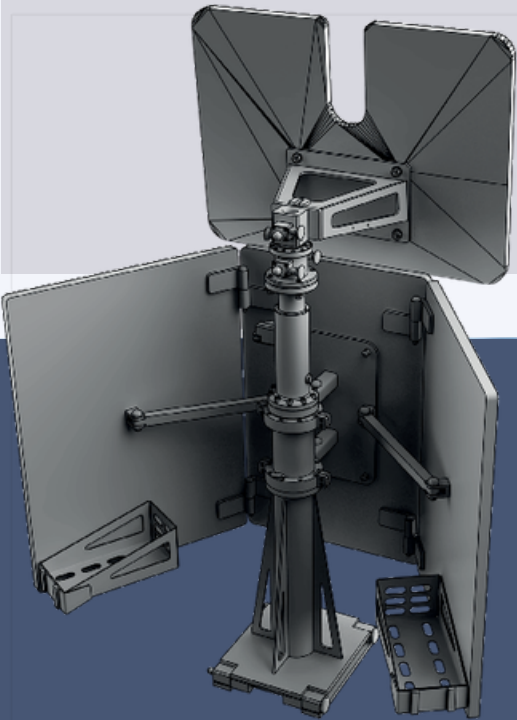

3 ADAPTABLE AND EASY TO EQUIP
Supports easy installation of optional accessories like weapon sights and night vision.

SOFT MOUNT MAIN FEATURES

- Recoil control: Reduces recoil significantly.
- Stability: Improves shooting accuracy.
- Material: Stainless steel and/or Aluminium
- Protection: Designed for extreme conditions (arctic weather, dust, sea water corrosion).

PEDESTAL MAIN FEATURES

- **Versatile Design:** Compatible with various vehicles and vessels, offering multiple attachment options for optimal use.
- **Full Mobility:** 360-degree rotation with shooting range limiters and secure locking during movement.
- **Lightweight and Durable:** Portable, foldable, and easy to install without any special tools.

SOFT MOUNT AND PEDESTAL
- FINNISH RELIABILITY ON LAND,
AT SEA AND IN THE AIR

BEVENIC IS A TRUSTED PARTNER

offering industrial process expertise and tailored solutions to develop your business.

Our production and operations are based in Finland,
but we serve our customers worldwide.
